EDUCATION

M.Sc. in Computer Science

(California State University, East Bay)

Expected Grad: Jan 2027

GPA:3.2

- **Coursework:** Machine Learning, Advanced Algorithms, Database Systems, Cloud computing

B.Sc. in Computer Science

(SRM University, India)

Expected Grad: May 2023

GPA:3.8

- **Coursework:** Artificial intelligence, Data Structure, Operating Systems, Image Recognition

EXPERIENCE

Altheros capital- Frontend Developer Intern

Remote | Feb 2026-Present

- Designing and developing responsive web interfaces using React.js and JavaScript
- Developed a feature for users to upload and store cover letters, persisting data in the database and uploading files to AWS S3.
- Ensured secure storage and smooth integration between frontend and backend.

Sports Media INC- Full Stack Web Developer Intern

Remote | Jan 2026-Feb 2026

- Owned end-to-end email campaign architecture across multiple automated sequences. Designed and maintained reusable, mobile-responsive email templates

Investorey - Full Stack Web Developer Intern

Remote | Sep 2023 – Feb 2024

- Developed a scalable platform tailored for building comprehensive, industry-specific solutions with seamless enterprise integrations. The application is built using React.js, JavaScript, HTML, Tailwind CSS

Mphasis- Frontend Developer Intern

Remote | Aug-2023 - Sep-2023

- Contributed to the development of a GPT platform that gives healthcare practitioners access to generative AI technology. Technologies used HTML, CSS, JavaScript.

PROJECTS

Hackathon Project - Gemini 3 Hackathon (React js, Gemini 3, AI, Python)

- Built an AI-powered resume analysis tool using Gemini 3 that compares resumes with job descriptions to generate a match percentage, identify missing skills, and highlight gaps.
- The tool also provides improvement suggestions, detects grammar and formatting errors, and automatically optimizes resumes to improve ATS compatibility and shortlisting chances.

AI SaaS Platform with Subscription Billing (PERN Stack, Clerk, Stripe, Docker)

- Developed a full-stack AI SaaS app with user authentication, subscription billing, and AI-powered tools including article generation, blog title creation, image generation, background/object remover, and resume analyzer using PostgreSQL, Express, React, Node.js, and Neon serverless DB.

Technical Skills

Languages- Python (Numpy, Pandas, Scikit-Learn, Matplotlib, Seaborn, PyTorch, Tensorflow), HTML5, CSS(Tailwind), JavaScript (React, Next.js, NodeJS, AngularJS), SQL, PostgreSQL, MongoDB

Technologies- Linux, AWS, Google Cloud, LangChain, LLM, Git/GitHub

EXTRACURRICULARS

IBM SkillsBridge - Enterprise Agentic AI Learning Lab

Feb-2026 to May-2026

- Building an agentic AI prototype using IBM watsonx and open-source tools to solve real business challenges. Collaborating in a 3-person team to apply design thinking and agile methods to develop enterprise-ready AI solutions. Expected to earn IBM digital credentials upon completion

Research paper published in IEEE conference 2023

- "Cursive Handwriting Recognition Using CNN with VGG-16" [IEEE Link](#)

Research paper accepted at the ACCAI conference -2023
