

SUMMARY

Aspiring Product Manager with experience in UX research, user testing, and cross-functional collaboration to build user-centered products. Skilled in user interviews, usability testing, and translating insights into actionable improvements. Strong foundation in analytics and Economics, with tools like SQL, Python, Excel, Qualtrics, and Figma.

EDUCATION

Bachelor's Degree in Economics

(San Jose State University)

Expected Grad: June 2027

Associate's Degree in Economics and Business

(Foothill College)

Grad: May 2023

EXPERIENCE

Tata Elxsi - UX Research Moderator

On-Site | 2025 – 2026

- Analysed Qualitative and behavioural data from 15+ user research sessions to identify usability trends, friction points, and unmet user needs.
- Translated research insights into actionable product recommendations, informing design and product decisions around 3-5 cross-functional teams.
- Collaborated with product managers, designers, and engineers to improve user workflows and enhance product usability
- Evaluated user interactions and feedback to assess product performance and identify areas for improvement
Synthesized research findings into clear reports and insights to support data-driven decision-making for product development

Tata Elxsi - Operations Coordinator

Hybrid | 2025-2025

- Conducted site inspections for 65+ residential and commercial properties to evaluate safety, operational, and logistical requirements
- Documented site conditions through 30+ detailed reports, photos, and videos to support planning via Microsoft Office. Coordinated with property owners, vendors, and internal teams to gather requirements and ensure project readiness. Developed precise floor plans, including emergency escape and fire routes, to support testing needs and regulatory standards

PROJECTS

Sales Data Analysis and Dashboard

- Cleaned and analyzed 1,000+ sales records using Excel (VLOOKUP, IF, pivot tables) to identify revenue trends and performance insights. Built an interactive dashboard to track KPIs, uncovering top regions, peak sales periods, and underperforming products.

Improving Mobile App Onboarding Experience

- Conducted usability testing and user behavior analysis to identify onboarding drop-offs and friction points. Synthesized insights and created a user journey map to highlight key usability issues and improvement areas.

CERTIFICATION

Foundations of Project Management

Google / Coursera

- Gained knowledge of project lifecycle, Agile & Waterfall methodologies, and key project management principles
- Developed skills in stakeholder communication, risk management, task prioritization, and workflow optimization
- Learned to use tools and frameworks for planning, scheduling, and managing cross-functional projects

Technical Skills

Technical Skills- Excel Planning & Scheduling Stakeholder Management, Risk Analysis, Communication, Google Sheets, Qualtrics, SQL
